

## CCIC Video Requirements

As a valued supplier to GP Harmon Recycling, please be advised of the following new requirements.

Effective March 31, 2014, in addition to the existing photo requirements for shipments to China, video cameras must be used to record the loading process.

The video camera needs to be placed in such a way so that the materials being loaded through the back door of the container can be seen throughout the loading process.

This video record must be saved for at least three (3) months.

An instructional video will be posted in the near future.

Thank you in advance for your cooperation.
